

About Ethics, Rules and Morality

Any Organization is worth the value system it holds and adheres to. Avert Society is an 'Instrumentality of the Government' and is a funded Organization. It is thus accountable to the Governing Board technically and to the People - morally. We are duty-bound to ensure that both the 'Ends' as well as the 'Means' are valued in pursuit of our mandate. Following framework broadly suggests what we value and what we do not approve. These are things to be imbibed by newcomers and to be guarded by the employees cautiously. Such enumerations can only be indicative – never exhaustive. After all, the best Auditor is your Conscience.
